

## PräziCoat XS

### Gluing machine

The **PräziCoat XS** is a solid two-roller gluing machine for both cold and hot glue.

The machine is characterized by the following features:

- + suitable for hot and cold glue
- + very smooth running
- + even glue application
- + easy cleaning
- + automatic water feed (optional)
- + cover material release with the glued side facing upwards (optional)
- + adjustable roller speed
- + heatable glue tray with temperature control
- + high paper weights may be processed
- + built-in air circulation

#### Technical data:

**Floor space:** 60 x 45 cm  
**Height:** approx. 25 cm  
**Weight:** approx. 50 kgs

**Roller width:** 350 mm  
**Power supply:** 230 V - 50 Hz (A. C.)

Subject to technical alteration.

# The World of Bookbinding.

## ***PräziCoat XS***

The **PräziCoat XS** is a solid two-roller gluing machine for both cold and hot glue and is well-known for its smooth running.

The layer of glue is applied very evenly and may be adjusted by modifying the distance of the two rollers to one another. The adjustment is done by two adjustment screws situated above the bearings of the upper roller. The speed of the glue rollers is continuously adjustable.

For use with hot glue the **PräziCoat XS** is equipped with a heated glue tray with temperature control. The machine may be cleaned very easily.

When using hot glue, the glue tray is lowered and superfluous glue is wiped off the rollers and then rinsed with water. Then the machine is simply cooled down. When using cold glue, the tray is filled with water and the turning rollers clean themselves.

### Applications:

cloth sheets

laminated cover paper

paper

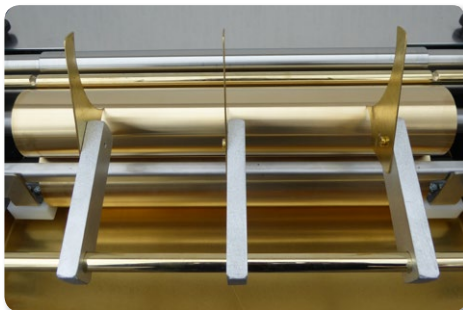

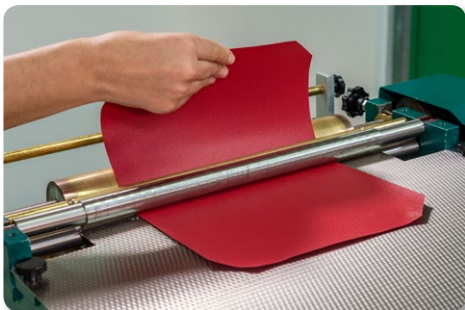

cardboard

leather

miscellaneous cover materials
